Resources for Members of the National Network of Libraries of Medicine (NN/LM)

Advancing the progress of medicine and improving the public health through access to health information. Join the network or find local resources by clicking on the links below or call us at 1-800-338-7657.
NN/LM NER
Public Health Outreach

- Address the information needs of the public health workforce
- Promote awareness of information resources for public health practice
- Facilitate access to health information
- Connect public health workers to network member libraries

The Pathway to Evidence-Based Resources

Evidence-Based Guidelines
Evidence-based public health guidelines based on systematic reviews of the research literature.

Systematic Reviews
Systematic reviews and meta-analyses of the public health literature.

Pre-Formulated and Filtered Searches of Published Studies
Specialized searches of PubMed/MEDLINE on specific health topics or type of research study.

Best Practices
Public health programs, interventions, and policies used by others that have been evaluated and shown to be successful.

Other Resources

Public Health Journals

Public Health Databases

Knowledge Domains of Public Health
The Pathway to Evidence-Based Resources

Evidence-Based Guidelines
Evidence-based guidelines based on a systematic review of the research literature. The guidelines provide summaries of evidence and recommendations for practice from government agencies, professional organizations, and convening expert panels.

Systematic Reviews
Systematic reviews and meta-analyses of the literature that use specific methods and criteria to locate, appraise, and synthesize the evidence from research studies. The reviews uncover the strengths and weaknesses of the evidence and identify gaps in current research.

Pre-Formulated and Filtered Searches of Published Studies
Specialized searches of PubMed/MEDLINE on specific public health topics or limited to studies that correspond to a specific research category.

Best Practices
Public health programs, interventions, and policies that through experience have been evaluated, shown to be successful, and have the potential to be adapted and transformed by others working in the same field.
Pathway to Evidence-Based Resources

What is the Community Guide?
The Guide to Community Preventive Services is a free resource to help you choose programs and policies to improve health and prevent disease in your community. Systematic reviews are used to answer these questions:
- Which program and policy interventions have been proven effective?
- Are there effective interventions that are right for my community?
- What might effective interventions cost; what is the likely return on investment?

More than 200 interventions have been reviewed and the Task Force on Community Preventive Services has issued recommendations for their use. Learn more about the guide, our systematic review methods, and the Community Guide team.

All Community Guide Topics
- Adolescent Health
- Alcohol
- Asthma
- Birth Defects
- Cancer
- Diabetes
- HIV/AIDS, STIs & Pregnancy

- Vaccines

Best Practices
Public health programs, interventions, and policies that through experience have been evaluated, shown to be successful, and have the potential to be adapted and transformed by others working in the same field.
Pathway to Evidence-Based Resources

Welcome!

health-evidence.ca aims to support evidence-informed decision making in public health by providing current research evidence in a searchable online registry. Findings of a research project funded by the Canadian Institutes of Health Research demonstrated a need for a reliable source of review evidence that public health practitioners and decision-makers could easily access and employ.

The health-evidence.ca team regularly searches for, screens, and rates systematic and narrative reviews, and then makes the results public.

New in Evidence-Informed Decision Making...

The Canadian Cochrane Centre Needs Your Help
October 09, 2009

Have you been enjoying the open access to high quality Cochrane Reviews? The Canadian Cochrane Centre needs your input in order to extend the national license. Please visit http://tiny.co/cochrane_survey to complete a brief survey.

About Evidence-Based Practice for Public Health

Evidence-based practice for public health involves using the best available evidence to make informed public health practice decisions. This website provides free online access to evidence-based public health (EBPH) resources, knowledge domains of public health, and public health journals and databases. The resources are arranged along a pathway of evidence to allow public health practitioners to easily find and use the best evidence to develop and implement effective interventions, programs, and policies.
