http://esciencelibrary.umassmed.edu

The e-Science Portal is a resource for librarians, library students, information professionals, and interested individuals to learn about and discuss:
- Library roles in e-Science
- Fundamentals of domain sciences
- Emerging trends in supporting networked scientific research

Getting Started in e-Science

Preparing eScience Librarians for Managing Research Data

Data Management

Data Life Cycle

Plan
Collect
Analyze
Integrate
Assure
Preserve
Describe
Discover

Research Environment

What is open science?
“science carried out and communicated in a manner which allows others to contribute, collaborate and add to the research effort, with all kinds of data, results and protocols made freely available at different stages of the research process.”

Research Information Network, Open Science case studies
www.nimr.ac.uk/our-work/data-management-and-curiosity/open-science-case-studies

Sponsored e-Science Programs:
We encourage community involvement in the portal through comments, discussions, contributions and attending events. Join the conversations and participate in the New England e-Science Librarian Community!
