

Family Medicine Moments

March 7, 2024

Introduction: This week I have a visual treat. Last week Sara Shields and I had a session with the PGY1s on the topic of medical humanities and one of the prompts was to go into the hospital and return with a photo of something that is meaningful to you - can be a piece, a thing, a person. The discussion that ensued from these photos was wonderful! I am sharing some of the photos here for you with their title. Enjoy.

Photos of Meaningful Things and Places
